The Truth about Death

**G**od warned our first parents that disobedience would result in death. He cautioned them that any departure from His instruction would result in the curse of death. Now, thousands of years removed from the perfection of Eden, we recognize the truth of God's Word. Since the fall of humanity, the mortality rate has been 100%. We inherited the best that Adam could offer—the DNA of death.

The answers to the question that have eluded the minds of so many are: what happens when you die? What is our condition after death? Where do we go? Are we immortal by nature? Are the dead able to communicate with the living?

At funerals many walk away confused about the answers to these important questions. One person teaches that our loved ones are looking down on us. Others teach that our deceased are now our guardian angels and have been exalted to a place where they are intricately still involved in the affairs of our lives. Some even teach that we can communicate with the “dead” and they can communicate with us.

If television and society were our only source for answers, then we could compile a list of conflicting views and choose our preference. But the Bible does not leave us to wonder on this very important topic. You will discover that a clear understanding of the condition of man and death will reveal the truth about the character of Jesus.
